

Lima, March 30th, 2022

To whom it may concern,

This letter is to introduce Mr. Mauro Chumpitaz, a Peruvian citizen (passport: 221040208), who worked between 2020 and 2021 as Technological Developer at the Water Research and Technology Center (CITA).

During this period, Mr. Chumpitaz carried out the following tasks:

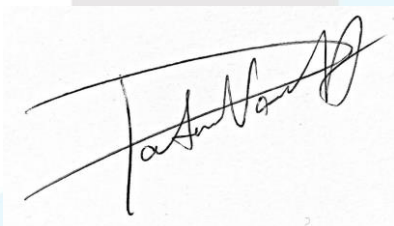

- Microcontrollers programming
- Programming in C, Arduino and Python
- Design of circuits and electronic boards
- Use of version control system - Git
- Development of Internet of Things systems
- Data visualization interface design
- Management of servers and database
- Web page programming

These tasks allowed Mr. Chumpitaz to develop the following skills:

- Teamwork
- Self-taught and proactive learning of programming languages
- Strategic activity management
- Versatility for different tasks such as reporting expenses, purchasing management

Therefore, I have a very positive opinion regarding the performance of Mr. Chumpitaz in the tasks assigned to him.

Sincerely,

Dr. Patrick Venail Zorro
Director, Environmental Engineering School
Director, Center for Water Research and Technology (CITA)
